## TW2000-05 Robot

Uses Double Spin Technology to feed no spin, top spin, under spin, side spin and has programmable spin control and ball ejection speed. These functions can not be performed by a single spin machine.

There are 9 different feeding positions. By pressing the left or right buttons on the Control Panel you can easily control and select the ball's trajectory angle.

The Table Tennis Robot has 3 different modes for the user to choose from:

- 1) Regular-mode (fixed feeding position)
- 2) Auto-mode (feeds irregular, left and right)
- 3) Self-mode (programmed by user);

The machine has memory function and can record inputted programs and memory of last plays mode and order. A collection net is used to automatically gather back the balls into the robot's feeding tray.

### Features:

9 Different Spins  
 30-100 balls/minute  
 4-50meters/sec  
 Feeds to 9 different positions  
 130 Ball Capacity

Price – \$1,150
